About Caribbean Green

A fully vertical medical cannabis company in Puerto Rico that secured the islands first cultivation, manufacturing and transportation licenses, and has three operating dispensaries.

The Challenges

Having formed before there was even a regulation written on how the medical cannabis program would work within Puerto Rico, Caribbean Green had to figure out how to navigate within the government to help shape the regulation and then position itself as a leader in the space to compete against much larger companies applying for licenses that had 10x the capital advantage.

Once the cultivation license was awarded to Caribbean Green, they then needed to figure out entirely new best practices on how to grow in tropical climates that are known to have some of the highest mold ratings in the world, regular hurricanes that cause structural damage, power & water outages for long periods of time, extremely high power costs, and physical security for the plants and the staff.

The Solution
